

Crediting Tofu and Tofu Products in the Child and Adult Care Food Program

This guidance applies to meals and snacks served in child care centers, family day care homes, emergency shelters, at-risk afterschool care centers, and adult day care centers that participate in the U.S. Department of Agriculture's (USDA) Child and Adult Care Food Program (CACFP). For information on the CACFP meal patterns for children and crediting foods, visit the Connecticut State Department of Education's (CSDE) [Meal Patterns for CACFP Child Care Programs](#) and [Crediting Foods in CACFP Child Care Programs](#) webpages. For information on the CACFP adult meal patterns and crediting foods, visit the CSDE's [Meal Patterns for CACFP Adult Day Care Centers](#) and [Crediting Foods in CACFP Adult Day Care Centers](#) webpages.

Commercial tofu and tofu products must meet two criteria to credit as the meat/meat alternates component:

- they must be easily recognizable as meat substitutes, such as a tofu burger or tofu sausage; and
- the tofu ingredient must contain at least 5 grams of protein in a 2.2-ounce serving by weight ($\frac{1}{4}$ cup volume equivalent).

CACFP facilities must maintain documentation on file to indicate that tofu products comply with these requirements.

Commercial Products Made with Tofu

For commercial tofu products, the tofu ingredient must contain 5 grams of protein in 2.2 ounces to credit as 1 ounce of the meat/meat alternates component. Menu planners cannot use the Nutrition Facts panel to determine if commercial tofu products meet this requirement. The Nutrition Facts panel shows the amount of protein in the **food**, not the amount of protein in the **tofu ingredient**. To credit tofu products in CACFP meals and snacks, CACFP facilities must obtain a product formulation statement (PFS) from the manufacturer that indicates the amount of protein in the product per serving. For more information, refer to the CSDE's resource, [Using Product Formulation Statements in the CACFP](#).

Products made with tofu that are not easily recognized as meat substitutes cannot credit as the meat/meat alternates component, even if they meet USDA's protein requirement. Examples include tofu blended into a recipe (such as soup) and tofu that does not represent a meat substitute, e.g., tofu noodles. These foods do not meet the customary and usual function of the meat/meat alternates component. The USDA's intent for this requirement is to ensure that CACFP facilities

offer foods from the meat/meat alternates component in a form that is recognizable to participants. The USDA emphasizes the importance of the nutrition education aspect of the CACFP, which includes the goal of helping participants easily recognize the key food groups that contribute to a healthy meal.

Commercial Tofu

Menu planners must use the Nutrition Facts panel to determine if a commercial tofu product meets the USDA's protein requirement. A product that contains at least 5 grams of protein in a 2.2-ounce serving by weight credit as 1 ounce of the meat/meat alternates component.

Table 1 shows how to calculate compliance with the USDA's protein requirement, using the sample Nutrition Facts panel for the tofu product on the right. This product contains 6.6 grams of protein in 2.2 ounces, which exceeds the USDA's minimum protein requirement of 5 grams. Therefore, a 2.2-ounce serving of this product provides 1 ounce of the meat/meat alternates component, if the product also meets the USDA's requirement for being easily recognizable as a meat substitute.

CACFP facilities must maintain product documentation on file for the Administrative Review of the CACFP.

Table 1. Steps for determining if a tofu product meets the protein requirement

1. List the grams (g) of protein per serving from the Nutrition Facts label.	A	9	grams
2. List the serving size in ounces (oz) from the Nutrition Facts label.	B	3	ounces
3. Calculate the grams of protein per ounce (divide A by B).	C	3	grams per ounce
4. Calculate the grams of protein in 2.2 ounces (multiply C by 2.2).	D	6.6	grams in 2.2 ounces
5. Is the amount in D at least 5 grams? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If “yes,” the product meets the minimum protein requirement.
